

Ideation Phase

Empathize & Discover

Date	October 3, 2026
Team ID	SWTID-2026-6228
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps the team understand the user of this project, **Import Data using Transform Maps (Spreadsheet)**, from the user's own perspective, along with the goals and challenges faced while moving employee data from a spreadsheet into ServiceNow.

User Persona:

User	A ServiceNow administrator or HR data coordinator who maintains employee details (Employee ID, Name, Email, Department, Location) in an Excel spreadsheet.
Goal	Import the spreadsheet data into the Employee Test table and update existing employees without creating duplicate records.
Challenge	Manual entry is slow and error-prone, creates duplicate or inconsistent records, and spreadsheet columns do not match the target fields automatically.
Need	A structured import using an Import Set Table and a Transform Map, with Employee ID as the unique field, followed by verification of the results.

Project Flow Behind the User's Experience:

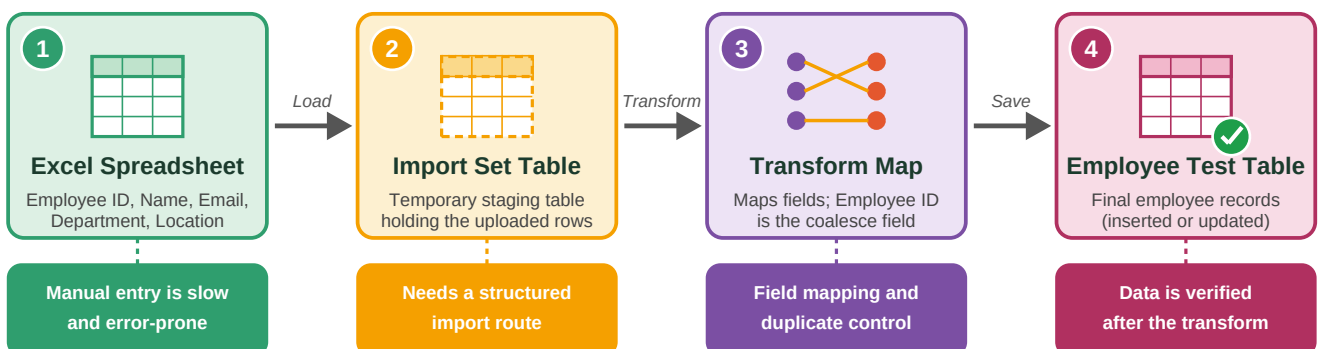

Figure: Spreadsheet data flows through a staging table and a Transform Map into the Employee Test table. The coloured boxes show the user need each stage addresses.

Example: Import Data using Transform Maps (Spreadsheet)
